Drill results buoy mining hopes

THE good news for the West Coast mining industry continues with the best drilling results to date achieved at Venture Mining's Mount Lindsay Magnetite-Tin Project near Savage River.

The West Australian-based company said yesterday it had achieved exceptionally good results drilling for magnetite.

The Mount Lindsay project is located 25km south-east of the Savage River Magnetite Mine and 15km north-west of the soon-to-be-reopened Renison Bell Tin Mine.

Venture Minerals has three diamond core drill rigs on-site working on the initial 10,000m drill program. It has drilled almost 3000m.
